This publication is the outcome of a research project funded by the Department of Architecture Construction Conservation (DACC) of the Iuav University of Venice, which I directed, and is entitled "Building on Built".

My thanks go to the Department Director Antonella Cecchi, to the Director of the MA Degree Course Armando Dal Fabbro and to all the colleagues with whom I worked and who supported this project, even if they are not present in this book, such as Professors Andrea Benedetti, Emanuela Sorbo and Lamberto Borsoi.

The project involves four other foreign Universities for the necessary international dimension that these issues imply. For this reason, I must thank Marielle Riche, the former Director of ENSA Marseilles, and current Director Jean-Marc Zuretti, as well as the Assistant Director Véronique Roblin; Philippe Bach, the Director of ENSA Paris Val de Seine and Donato Severo of ENSA Paris; Mr. Narciso Vázquez Carretero, the Director of The High Technical School of Architecture of Seville, and Mr. Luis Rey Goñi, as Ambassador of the Singularity University Seville. I would also like to thank Emilio Antonioli for the effort and patience he brought to bringing this book to term, and to all my teaching collaborators.

My thoughts also go to Guya Bertelli, Director of the Piacenza Pole of the Politecnico di Milano, where I first began this Skype connection pilot experience.

Finally, my gratitude goes to Carlo Magnani, who has promoted the international workshops since 2002, enabling a broader discussion of architectural design issues and of the relationship between teaching and research.

Cover:

Regeneration project of the
Pouillon complex in Paris. Project
by Bergamo, Fent and Tosoni.
Construction on the built, the
regeneration of Greenpoint
Manufacturing & Design Center
in New York. Model by Fani
and Arri.
